Work experience placements

Careers with Toshiba

Solutions are what we are all about at Toshiba Tec – we help organisations make their daily processes more efficient through a number of advanced technologies. However, technology is not the only thing that advances; we are also invested in the careers and opportunities of our staff, and our future employees.

With the next generation of employees in mind, we are proud to support a number of school-based initiatives across the UK, offering work experience and career advice to young people.

Along with a number of opportunities, we are pleased to be able to offer work experience to secondary school students from Birmingham. Placements are available in a number of Toshiba's core operations, including service, customer support, professional services, technical, training, and more – all taking place at our West Bromwich office.

In addition, we have been working in partnership with the Association of Professional Sales (APS), to promote sales professions as an attractive and viable career path to young people. As such, the 'Sales in a Box' scheme has been developed - available to secondary schools, this programme aims to provide a clear idea of what a career in sales is like and whether it is a suitable career choice for individuals.

For more information on any of the above, please contact your BCC Schools Framework Account Manager:

Birmingham City Council has scooped Gold for the eighth year running at RHS Chelsea Flower Show 2019 for a display recognising the need for action on climate change.

Do you have teachers retiring or moving on to pastures new? School awards or proms?

Find out what our multi award winning Floral Decorating Unit can do for your staff and pupils special day. [View more](#)

"I have recently started my role and I have found the advice, support and guidance from the Procurement team, in particular Claire Lewis, invaluable. There is a genuine concern for our issues and things are acted on very quickly. There is a strong ethos of customer care across the staff that I have dealt with, which is very refreshing. I do believe that establishments should not be without this service level agreement, it is value for money."

"Just wanted to let you know how helpful it was being able to speak to all the suppliers. As we have recently had the free health check and you have highlighted potential savings I was able to discuss with the suppliers switching to them in the new financial year.

Please pass my thanks on to everyone who organised the event."

Sue Salter, Bursar
Hodge Hill Girls School - Feb 2019
